Attention: J. Wildermoth

RE: MT Roskill Fire Station

Hi John,

As per our previous discussions, the cavity units we are supplying to the above project are N.Y.K.O brand, manufactured by Eurostyle Ltd. Hamilton, not CS Sliders.

Or reasons for the use of N.Y.K.O. brand are numerous, but the main points are:

- a. Extremely robust, reliable and proven units.
- b. Excellent back up service (rarely called upon).
- c. No hidden costs or extra's from the time of quotation to ordering, i.e. changing linings from say 10mm gib board to 13mm, as opposed to CS where every change has a penalty.
- d. Cost efficient.

B&H Doors have utilised N.Y.K.O. cavity units since they became available on the market. These have given trouble free service on every project we have supplied units for, including some high use buildings such as Browns Rd. Super clinic, Ascot Hospital, the Beehive refurbishments stage 1 and 2, Manukau Courthouse, Manukau Police Hub stage 1 and 2, plus many retirement villages, schools and medical facilities.

B&H Doors stand 100% behind any N.Y.K.O. cavity unit supplied to our projects.

Should you wish for any more information, please do not hesitate in making contact.

Regards,

Brett Harrison
